Work Experience

Intern at SiPSAP Optimization   Aug 2021 - Sep 2021

In my internship, I leaned towards **mobile application development.** I learned the **basic principles in designing 3 tier application.** Those principles helped me develop multiple projects on the university level. The projects are:

1. Electronic Voting Machine - an application to cast a vote after verifying your personal information
2. Gym Fit - an application which churns out personalized diet plans and workout routine
3. Carbo - an application which assists and enables anyone in carpooling

Education

Computer Science- BSC   2019 - 2023

FAST, Islamabad
